

## Holiday Camps '21

## Python 10-12 years

\$225

### What is Python?

If you're going to learn how to code, why not choose one of the most used coding languages in the world? Consistently ranked 1st as the "Most Popular Coding Language", Python is versatile and a practical text-based programming language that is suitable for students with zero coding experience, as well as data scientists and AI developers alike.

### Camp Structure

Live one-on-one sessions online

Experienced teachers

Timings that work for you

Personalised lessons

5 day camp: Monday to Friday

90 minute interactive class

Receive a certificate upon completion of each level

## Python Recruit

Students focus on computational thinking skills and learn syntax coding to create custom apps and games from the ground up. This camp provides them with a great foundation for unlimited coding opportunities.

### Core Learning

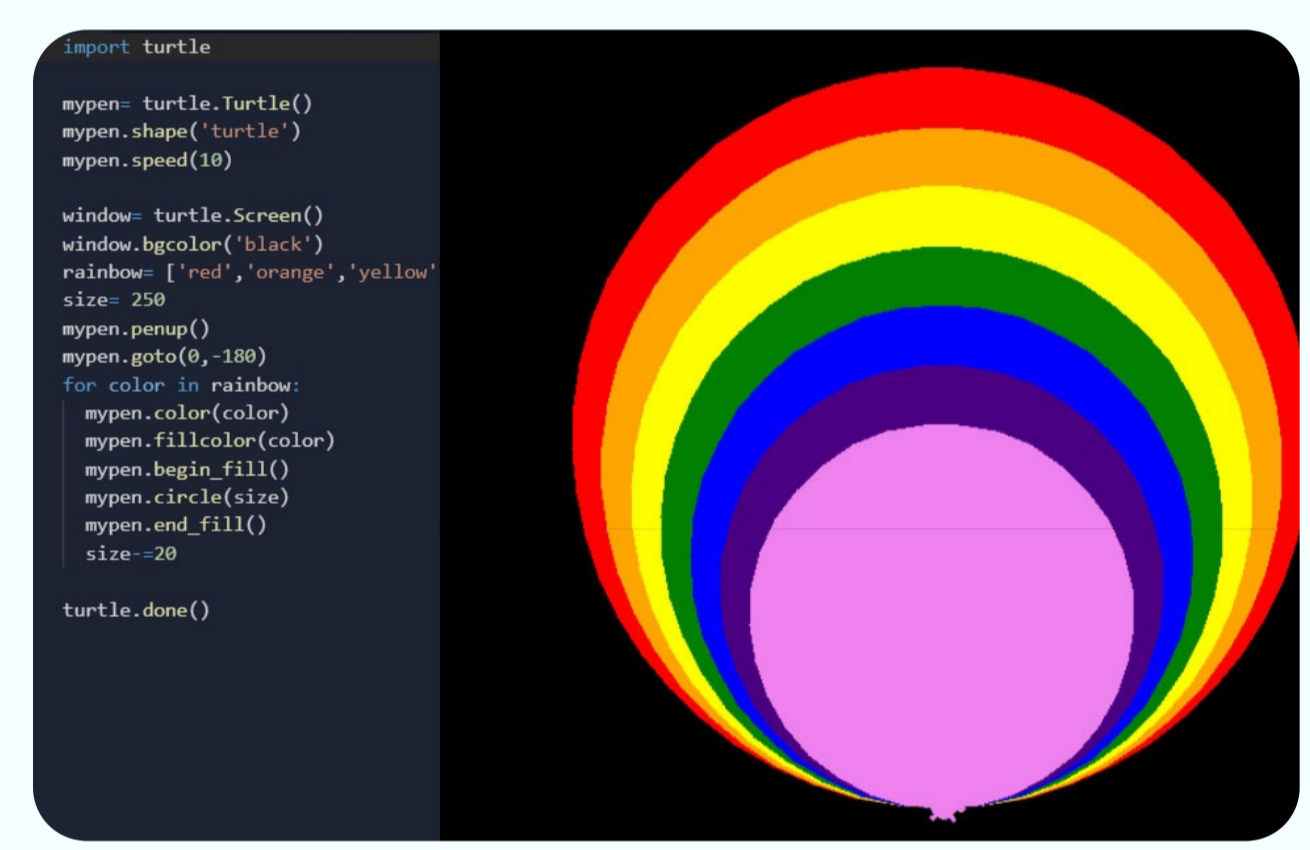

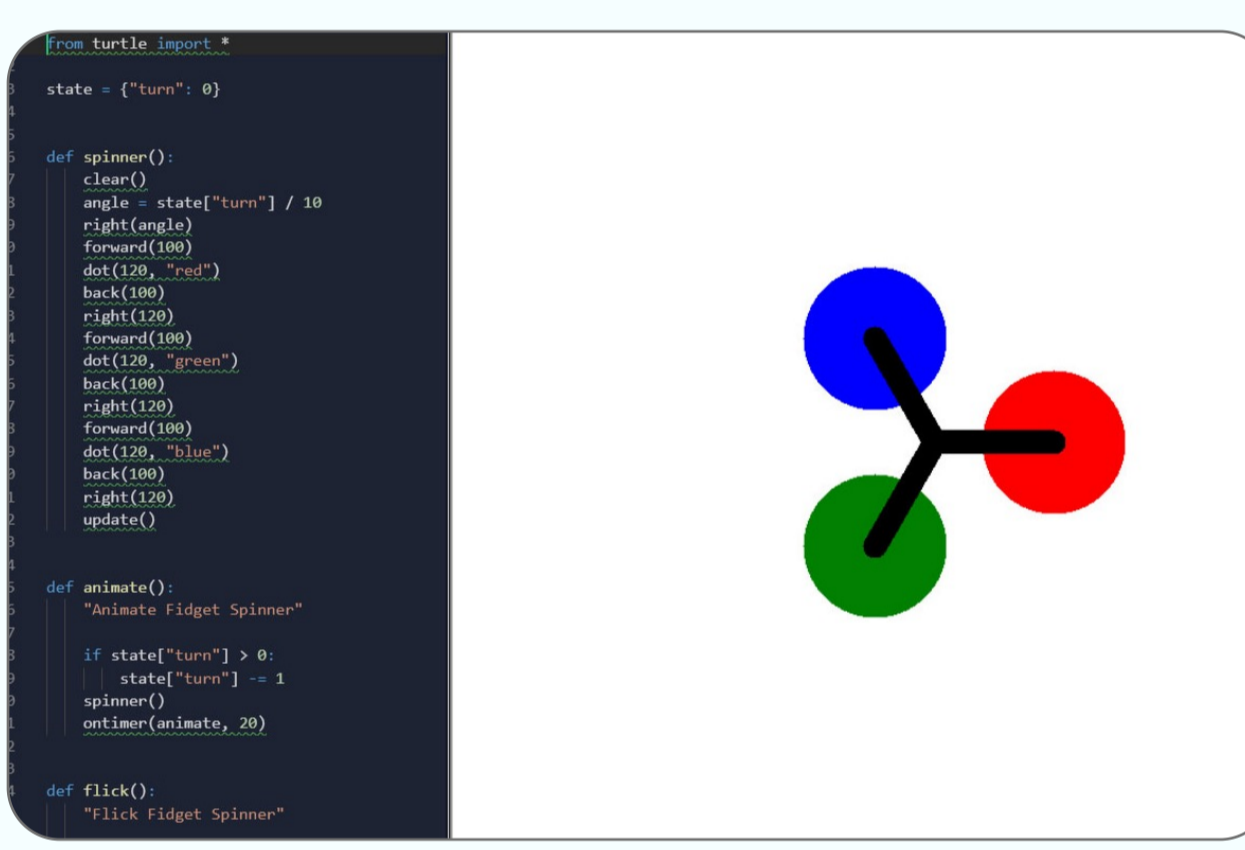

- Write their first lines of Python code using Replit – an popular teaching platform used for many programming languages.
- Cover fundamental coding concepts including loops, conditionals, variables, events.
  - Design a Graphical User Interface (GUI) concept using Python code.

Logical Reasoning

Critical Thinking

Disruptive Innovation

### Sneak Peek

### Prerequisites

This is a beginner level camp with no experience necessary.

## Certifications

### Python Wiz

### System Requirements

A laptop with connected keyboard and mouse, webcam, and a good Wi-Fi connection.
