The Future of Education

In a world dominated by technology, today's youth need to understand how it works in order to thrive. Children of today need to build 21st century skills like critical thinking, problem solving and creativity.

Alphagen Learning is an online academy that provides 1 on 1 classes for kids and teens across several areas of technology including coding, graphic design, virtual reality and more.

Our goal is to empower this new generation, equipping them with critical life skills that help them unlock their own ideas and passions through technology.

Coding & Technology Camps

Ages 10 - 12

The season of fun and learning has begun.
Make sure your child makes the most out of it!

Graphic Design

Draw inspiration from the world around you

Canva 10–12 yrs old

1 Camp Available

$225/camp

5 days • 90 minutes per day

Artistic expression has a great role to play in thedevelopment of your child's unique blueprint. In today's world, kids need to be confident presenters and communicators. Graphic design equips your child with the tools to share clear, concise, and memorable messages with peers and teachers. Canva is an intuitive yet powerful platform that equips users with an array of templates that they can customise to suit any requirement.

Best suited for: Everyone! Watch your young learner blossom as they showcase their creative genius.

Your child will learn

- Creative Expression
- UX Design
- Communication

Graphic Design

• Graphic design equips your child with the tools to share clear, concise, and memorable messages with peers and teachers.
• A focus on STEAM (Science, Technology, Engineering, Arts, Math) helps develop hard and soft skills to solve problems. Artistic exploration helps expose students to the creative process and increase their critical thinking skills.

Core Learning

• Boost your child's confidence in completing homework and school projects
• Deepen understanding of visual design through hands-on trial and error
• The possibilities are unlimited. Watch your young creator design posters, cards and more!
• Add a unique dimension to projects using photo editing, filters, and a stunning range of special effects.

Prerequisites: This is a beginner level camp with no experience necessary.

Sneak Peek

Students will learn to design a poster or logo, Instagram posts, YouTube banners and more.

System Requirements

A laptop or tablet with connected keyboard and mouse, webcam, and a good Wi-Fi connection.

AlphaGen Learning
